

Beiter **TOOLS TO SIMPLIFY YOUR ARCHERY LIFE**

RIPCLUTCH SYSTEM

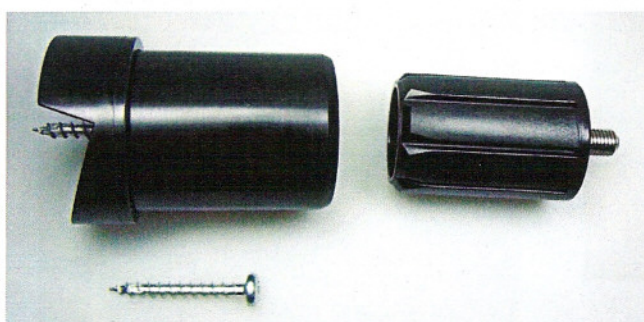

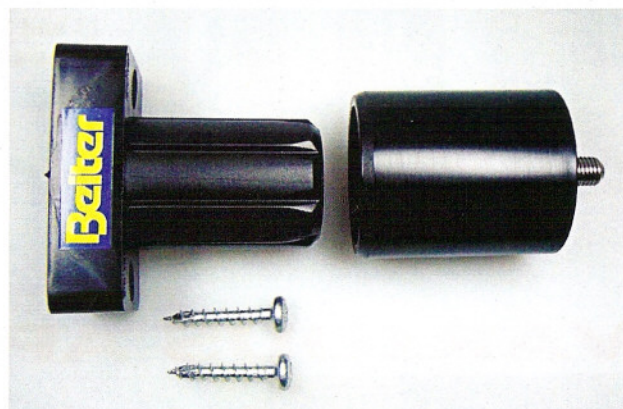

RIPCLUTCH SQUARE ►

The **Beiter Ripclutch SQUARE** as displayed in the picture can be used for many different purposes. Just to point out some examples:

@ an Archery Center or your Club House. To display beginner bows uniformly.

You can easily change the position of the bows, giving always a professional and good looking view to it.

Whenever you have to work on one bow, you take it off the Ripclutch (either the Square or the Round model), leaving the Adapter on the bow, and slip it on to another Ripclutch or the Kaindl Tool that you fixed on your work-bench!

@ your workshop. You can install all components fast and with both your hands free to work... no matter if you want to install a Peep, a Rest, a Plunger, a Clicker, a Sight... you will have two free hands!

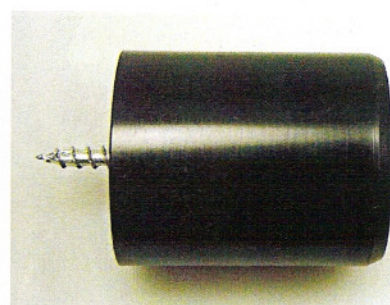

@ home. You can fix the Ripclutch with 1 or 2 screws (depending on the model) to any wood platform and start working on your bows,...serving a string, installing a peep and much more! It makes it easy to check Limbs Alignment and Center Shot!

◄ **RIPCLUTCH ROUND**

ADAPTER Ø42,3-Ø5 with screw ►

The Adapter Ø42,3-15 for the Ripclutch can be screwed to any surface, horizontally or vertically. You can use it with the Ripclutch on your bow, for example to hold your bow while serving.

But it can also be used as a container or cup for many small items which normally never do stay in place, rolling off your workbench, such as points, screws, nocks. Once you used it, you won't miss it!

▼ **ADAPTER GV & RIPCLUTCH**

The Kaindl Tool in combination with the Adapter GV with Ripclutch (picture left) or the Adapter GV (just the Green part) turns your Ripclutch System into a full rotating and universal usable Bow Vise. Simply fix the Kaindl tool wherever you want and start working!

ACCESSORIES & COMBINATIONS

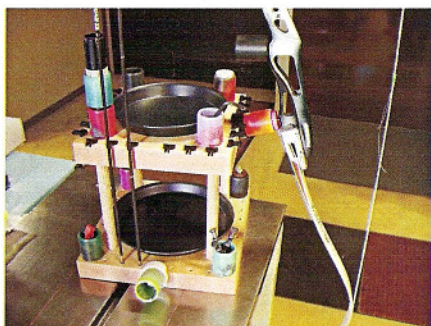

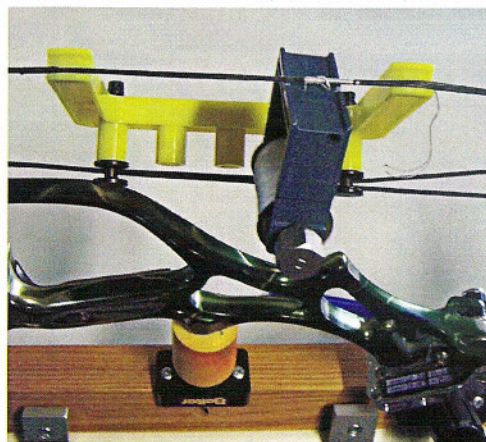

RIPCLUTCH EXTENSION ▶

The Ripclutch Extension gives you for example the chance to mount reflex bows on the Ripclutch System. Not only, sometimes you need some more centimeters to work more comfortable.

You just need a Ripclutch extension!
The available single parts to be combined as "Male to Male" (1 and 2) or "Male to Female" (1 and 3) are displayed in the picture at the left.
