Installing the spindle on the Beiter Winder:

Watch the printed thread indication on the side of the Winder (pic.3).

Click in the spindle (pic.4 and 5) only **after** threading the yarn through the rolls.

Clicking in the spool, pay attention that the rim-edged knobs are not too tight.

While threading the yarn through the slot (pic. 6), wrap it around your fingers twice and pull it once firmly into the slot.

If you want to remove the yarn, pull it completely out of the eye. Don't try to pull it out of the slot!
